DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 9 and 19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Re Claims 9 and 19, specification lacks written description to enable one skilled in the art to make the claimed invention. Claims 9 and 19 recite, "xDSL modems are operative to transmit to transit to the upstream xDSL in a contention-based protocol andto transmit to the plurality of downstream xDSL modems in a broadcast-based protocol.". Specification lacks description in implementing the contention-based protocol with the broadcast-based protocol. Specification page 7 discloses that the contention-based protocol can be CSMA/CD and the TDM-base protocol as the broadcast-based protocol. What is lacking is the description that clearly and concisely discloses the interoperability function between the protocols. Clearly, one skilled in the art recognizes a number of available contention and broadcast based protocols and without knowing the interoperability details results in undue experimentation.

Response to Arguments

3. Applicant's arguments with respect to claims 9 and 19 have been considered but are moot in view of the new ground(s) of rejection.
